THE FIRST ROBOTIC, TOUCHLESS  
BODY CONTOURING DEVICE USED FOR  
NON-INVASIVE PERMANENT FAT LOSS

[www.eonlaser.com](http://www.eonlaser.com)

# WHAT IS EON?

EON is the world's first robotic, touchless laser device that is FDA-cleared for use on the **flanks** and **abdomen**. EON is specifically invented to reduce stubborn fat safer, more comfortably and more effectively than ever before.

## HOW DOES EON WORK?

Personalized treatment mapping, application of 1064nm laser energy, and simultaneous cooling allow for robotic, touchless treatments for targeted apoptotic fat reduction.

EON heats targeted fat cells uniformly up to 51°C while proprietary cooling technology keeps skin cool and comfortable at 39.5°C.

Targeted fat cells begin slow programmed cell death (apoptosis). The body naturally disposes of the dead fat cells through the lymphatic system, a process that takes up to 12 weeks.

Permanent fat reduction is achieved 12 weeks after treatment. Average patient experiences 6.3mm of permanent fat loss.

# QUESTIONS?

## WHAT RESULTS CAN I EXPECT?

Although results vary among individuals, studies show patients experienced 21-25% average fat reduction after an EON treatment. Some patients lost as much as 40%. Best results are seen at 12 weeks.

## IS THERE ANY DOWNTIME?

Unlike other body contouring procedure options, no clean up or post-treatment care is necessary. There is no downtime with EON. You can go back to your day or the beach immediately following treatment.

## IS TREATMENT WITH EON SAFE?

Yes, EON has been proven safe and is FDA cleared for abdomen and flanks. Instances of PAH only occur with the process of fat freezing.

## HOW MUCH DOES A TREATMENT COST?

EON treatment prices may vary by location. Please consult your EON provider for more information.

## IS EON APPROPRIATE FOR ALL SKIN TYPES?

Yes. EON can be used on all skin types.

## COULD I BE INELIGIBLE FOR AN EON TREATMENT?

Yes. There are some contraindications that would prohibit eligibility for an EON treatment. Please consult your EON provider.

# TOTAL ABDOMEN TREATMENT

Treatment includes combined segments of the abdomen and flanks. Results shown after 12 weeks post treatment.

# FULL ABDOMEN TREATMENT

Treatment includes 3-4 segments on the abdomen and can be performed in one office visit. 21-25% fat loss results can be seen at 12 weeks post treatment.

# WHAT ARE DR'S SAYING?

## DR. JENNIFER WALDEN

M.D., F.A.C.S.

AUSTIN, TX & NEW YORK, NY

EON is a non-invasive device for permanent fat loss. We have used it in our practice for the past four months. The system's simplicity of operation and comfortable treatments impressed both our providers and patients. They also appreciate the state-of-the-art technology behind the device. I have been glad to offer the robotic, contactless approach, which couldn't be a more attractive characteristic to patients seeking elective aesthetic services amidst a pandemic.

## DR. CHAD DEAL

M.D., 3 TIME BOARD CERTIFIED COSMETIC SURGEON  
CHATTANOOGA, TN

I have never had an aesthetic energy-based device check every one of my scrutinizing points off the list. I am beyond impressed with EON's robotic, touchless technology that hovers over the patient's abdomen for an hour, and in 12 weeks, they have around 25% permanent fat loss. This is the first time I can see a medspa device giving results that you would expect with minor body contouring procedures in the operating room.

## DR. TOM FIALA

M.D., F.A.C.S., F.R.C.S.(C)  
WINTER PARK, FL

EON uses the well-known scientific principle of 'apoptosis,' which is heating the fat between 40 and 50 degrees Celsius to activate the body's natural cell turnover system, causing the fat cells to be gradually removed over three to fourth months. The laser energy heats the deeper fatty tissue to the temperatures needed to start apoptosis, while EON's powerful cold air jets keep the skin's surface cool and comfortable.

## DR. GREGORY A. BUFORD

M.D., F.A.C.S.  
DENVER, CO

It's very energizing to find a product that actually lives up to expectations. When I first heard about EON, I was skeptical. The technology sounded good, but I was cautious. Would it be just another flash in the pan? We've been using EON for a year now. Patients are happy with the procedure and the results speak for themselves. In the least successful treatment we've seen, a patient lost a little over two inches, which was impressive. The most successful patient lost around four-and-a-half inches.

**"I'm excited to offer the first revolutionary non-surgical robotic, touchless fat reduction system and be among the first providers in California to offer EON."**

- Dr. Greg Chernoff, M.D., F.R.C.S.(C), Sonoma, CA

EON is **MORE EFFECTIVE**

EON is **MORE EFFICIENT**

EON is **MORE COMFORTABLE**

**EON IS SMARTER BODY CONTOURING**

... and we can **PROVE IT.**

### MORE EFFECTIVE

#### TECHNOLOGY

- 1064nm laser that heats adipose tissue up to an industry leading 5°C (123.8°F).
- Higher temperatures are more effective in inducing apoptosis (slow cell death) in more fat cells.

#### EVIDENCE

- 6.3mm average fat thickness reduction
- 4.1 cm/1.6in circumferential reduction
- Most patients lost up to 2 belt sizes off their waistline
- 21 - 25% average fat reduction

### MORE EFFICIENT

#### TECHNOLOGY

- Proprietary skin cooling technology allows for hotter laser energy to be distributed, eliminating more fat in less time.
- EON treatments eliminate the need for time consuming applicators that require gels, straps, suction, or post-treatment massages – reducing time spent at your practitioner's office.

#### EVIDENCE

- Absolutely no downtime
- 20-minute treatments
- 100% personalized treatments

### MORE COMFORTABLE

#### TECHNOLOGY

- Laser energy heats fat cells up to 51°C (123.8°F), while EON's proprietary cooling technology keeps skin cool at 39.5°C (103.1°F) – that's only 4.5°F warmer than skin's normal temperature.
- EON's robotic arm is equipped with smart sensors that continually monitor skin temperature and allow EON to autonomously adjust laser power for patient comfort.

#### EVIDENCE

- Average pain score of 2.5 on a 11-point scale
- Over 96% of patients recommend EON treatments
